

The Hot Tip

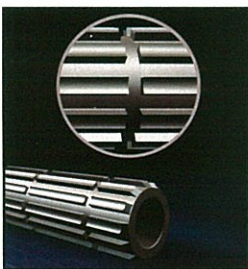

CARAVANING KAUFTIPP

The MOVECONTROL ECONOMY is the low-priced start-up model without abandoning the familiar REICH quality. The system features very wide friction rollers made of aluminium which may be engaged or disengaged manually by the cross actuation bar. The powerfull drive may be used to manoeuvre single-axle trailers up to a weight of 2,000 kg, while at the same time overcoming steep inclines up to 25% at a weight of 1,200 kg.

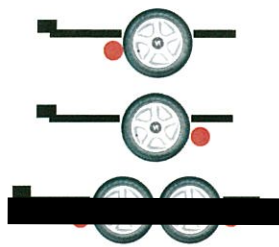

MoveControl is the only moving device, where the motors and gearboxes are located inside the chassis - protected from the spray of the tyres.

- Low-priced start-up model with 2 years guarantee
- Approved technic
- Direct drive of the driving rollers - no delicate power transmission over gear wheels or chains
- Cross actuation bar as standard, to use with brass or powertool - for easy and safety engaging and disengaging the driving rollers
- Without drive protection covers and without Motordrive (not possible)
- One remote control for all functions

ALU-driving rollers

Mounting reference:

- Light weight
- Unique patented surface
- Wear and abrasion resistant
- Large contact area at the tyre
- Optimum traction - even on worst conditions
